| • Html | • Css | • TailwindCSS | • JavaScript |
| • ReactJs | • NodeJs | • MongoDB | • Redux |
| • Redux toolkit | • RTK Query | • React Bootstrap | • RazorPay API |
| • JWT | • GitHub | • React Hot Toast | • React toastify |

PROJECTS

MRS(Movie Recommendation System)

- Built a movie recommendation interface using HTML, CSS, and JavaScript with dynamic content rendering and personalized suggestions.
- Designed a clean, responsive layout using modern CSS techniques for enhanced user experience.

Kerala Tourism

- Developed a responsive tourism website using HTML, CSS, and JavaScript to showcase Kerala's destinations and attractions.
- Designed an interactive and mobile-friendly UI with optimized layouts and smooth navigation effects.

Parallex website

- Developed a car showcase website using HTML, CSS, and JavaScript with engaging parallax scrolling effects and smooth animations.
- Designed a responsive and visually appealing interface optimized for performance and cross-device compatibility.

Courtly

- Developed a responsive tourism website using HTML, CSS, and JavaScript to showcase Kerala's destinations and cultural heritage.
- Designed an engaging UI with interactive image galleries and smooth navigation effects.
- Applied responsive web design techniques to ensure compatibility across devices.

Restaurant Billing System

- Collaborated with a team to design and develop a Restaurant Billing System using MongoDB, Express.js, React.js, and Node.js (MERN stack) for efficient restaurant order and billing management.
- Integrated database operations to store and retrieve menu items, customer orders, and transaction details securely.
- Implemented user-friendly UI for seamless interaction between staff and system, improving billing accuracy and speed.
- Gained practical experience in full-stack development, API integration, and real-time data handling using RESTful services.

Mpact

Developed a full-stack e-commerce web application with modern UI/UX design, featuring attractive parallax scrolling effects and smooth animations. Implemented product listing, cart management, user authentication, and secure checkout functionality using the MERN stack. Focused on responsive design, performance optimization, and user-friendly navigation.

DENSTACK

Developed a web-based hospital management system to streamline patient records, appointment scheduling, hospital operations, and sub-clinic management. Implemented sales tracking and comprehensive reporting modules to improve operational efficiency through secure data handling and structured database design
